Profile

I'm a fresher with expertise in web development and proficiency in javascript frameworks. I have build projects implementing javascript frameworks and excel in backend development with nodejs and frontend development with React.js and nextjs. My experience includes creating document management system, an e-commerce for gift shop, a website for beauty salon and an e-commerce for ladies garments(Sakhi). I'm excited to apply my learning and passion for real-world problems.

Experience

The Special Character

Web developer intern 1.5 month

- I have learned a lot from this internship and developed a web application – a document management system with my team.

VivaTrack Company (Registration management)

- I did an internship at Vibrant Gujarat-2024 in registration and management department for 15 days.

Languages :

Proficient in English , Hindi and Gujarati languages .

Projects

WISE CART :

- Wise Cart is an e-commerce platform for gift shopping, developed by our team using the MERN stack (MongoDB, Express.js, React.js, Node.js). It provides a seamless shopping experience, featuring an AI-powered chatbot for real-time assistance and personalized gift recommendations through third-party solutions. With its scalable design and efficient backend, Wise Cart offers a comprehensive, modern solution in the e-commerce gift market.in this project I contributed in frontend.

DOCUSYNC :

- Docusync is a document management system designed for secure document storage and sharing. Developed by our team using Next.js, Strapi, TailwindCSS, and PostgreSQL, Docusync offers a seamless and user-friendly experience for managing documents efficiently. Users can upload, organize, and share files with ease, ensuring streamlined collaboration.

SAKHI ([CLICK TO VISIT](#))

- Sakhi is an e-commerce platform specializing in ladies' garments, developed using the MERN stack (MongoDB, Express.js, React.js, Node.js). The project includes a main user-facing website for browsing and purchasing, along with a comprehensive admin panel for managing products, orders, and customer interactions.

VISUCEPT

- Visucept is a text to image generator website . It is developed using MERN stack for frontend and backend and Clip Drop AI tool to generate the images from the prompt.

RETROSNAP ([CLICK TO VISIT](#))

- An interactive digital photobooth experience where you can capture moments, add notes, customize your strip

with colors and stickers – and download it instantly!

Certifications

- The complete full stack web development bootcamp - Udemy ([May-2025](#))
- Python for Data Science – NPTEL (2023)
- Workshop on MERN Stack (APR-2023)
- Workshop on datascience (FEB-2022) .
